

An Exciting Adventure

Descend into a South American rainforest filled with exotic plants, several species of monkeys and beautiful toucans. Follow the bamboo-planked paths into the jungle where you find Orinoco crocodiles, Giant river otters and Anacondas. The journey continues underwater for a look at the River exhibit filled with turtles, catfish and the only Antillean manatee in the United States.

You are then surrounded by more than 85,000 gallons of saltwater exhibits where Moon jellyfish, stingrays, clownfish and rare Leafy seadragons are only a few of the intriguing marine life. See the colony of South African Black-footed penguins in their outdoor exhibit. Mundo Maya is an immersion exhibit that highlights the flora

and fauna important to the Maya culture. Animals such as venomous snakes, Ocelots, eagles, owls and flamingos can be seen. The 40-foot tunnel gives an underwater view of the Sacred Cenote that is filled with sharks. The tall Ceiba tree represents the Maya "Tree of Life." The archaeological and anthropological contributions of the Maya, add a new dimension to The Dallas World Aquarium.

Catering Facilities and Services

The Dallas World Aquarium offers a unique alternative for a variety of catered functions. The aquarium's floor plan will accommodate evening groups from 25 to 800, with additional outdoor options for up to 1,800 guests. The Endangered Species Gallery is available during the day for Business Meetings and Social Gatherings, with accommodations for 300+ guests.

For further information regarding in-house and off-premise catering fees and arrangements, please contact *Daryl's By Design* at 214-655-1444.

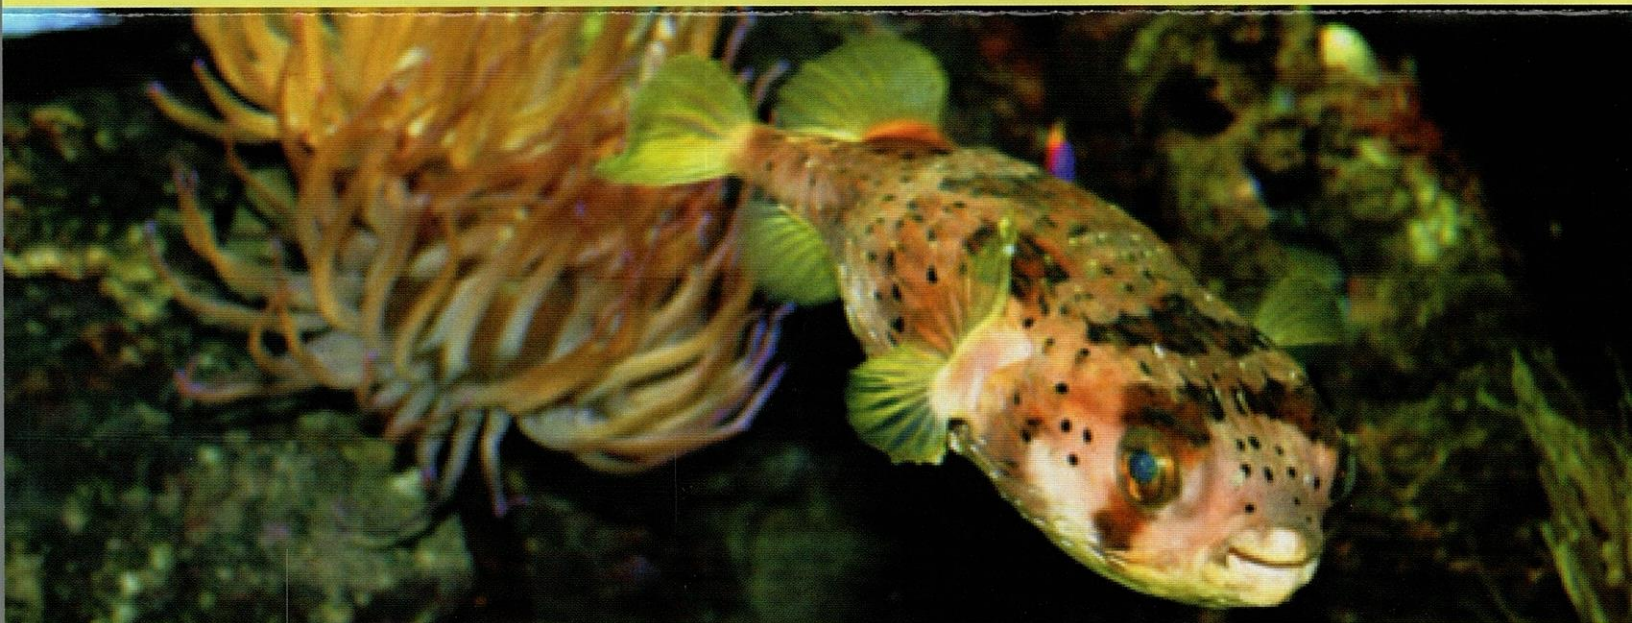

Gift Shop & Book Store

The Gift Shop and Book Store, like many of the exhibits, are full of treasure. Items include artifacts from far away places such as Indonesia, Fiji and Australia. Educational children's toys, jewelry, souvenirs and a wide selection of books are available.

Educational Opportunities

A trip to The Dallas World Aquarium can be a simple, educational experience or an in-depth study of the habitat, conservation, anatomy, reproduction and adaptations of plants and animals. Education rates (for 20 or more students) and group rates (for 15 or more people) are available. Call for more details.
