

Fish Body Shapes Activity

Name: _____

There are a lot of fish in the sea. And they all look very different from each other. Each is effective in their own way, despite vast differences in body shape. Draw your own unique fish with the body shape corresponding to each example picture.

Compressiform:

Flattened side-to-side

*Example:
Lookdown*

Depressiform:

Flattened back-to-front

*Example:
Polka-Dot Stingray*

Filiform:

Snakelike, rod-shaped

*Example:
Spotted Garden Eel*

Fusiform

Streamlined and fast

*Example:
Blond Naso Tang*

Globiform:

Round, globe-shaped

*Example:
Tasseled Anglerfish*
